**Cleft and Pseudo - Cleft Constructions in  
Standard Persian**

**The Thesis**

**Presented for the**

**Degree of M.A in Linguistics**

**School of Humanities**

**Tarbiat Modarres University**

**Mohammad Reza Ahmadkhani**

**Supervisor:**

**Dr. Mohammad Dabir-Moghaddam**

**Advisor:**

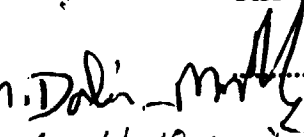

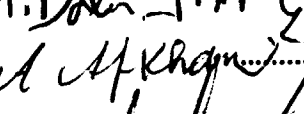

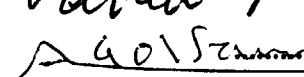

**Dr. Ali Afkhami**

**January 2001**

۳۸۳۹۳

We recommend this thesis by Mohammad Reza Ahmadkhani entitled:  
Cleft and Pseudo-cleft Constructions in Standard Persian  
be accepted as partial fulfillment of the requirements for the degree of  
Master of Art in Linguistics.

The committee on final examination:

	..... Dr.Mohammad Dabir-Moghaddam	Supervisor
	..... Dr.Ali Afkhami	Advisor
	..... Dr.Mohammad Mehdi Vahedi	Reader
	..... Dr.Arsalan Gholfam	Reader

بسمه تعالی

## آیین نامه چاپ پایان نامه (رساله) های دانشجویان دانشگاه تربیت مدرس

نظر به اینکه چاپ و انتشار پایان نامه (رساله) های تحصیلی دانشجویان دانشگاه تربیت مدرس، مبین بخشی از فعالیت های علمی - پژوهشی دانشگاه است بنابراین به منظور آگاهی و رعایت حقوق دانشگاه، دانش آموختگان این دانشگاه نسبت به رعایت موارد ذیل متعهد می شوند:

ماده ۱ در صورت اقدام به چاپ پایان نامه (رساله) ی خود، مراتب را قبلاً به طور کتبی به «دفتر نشر آثار علمی» دانشگاه اطلاع دهد.

ماده ۲ در صفحه سوم کتاب (پس از برگ شناسنامه)، عبارت ذیل را چاپ کند:  
«کتاب حاضر، حاصل پایان نامه کارشناسی ارشد / رساله دکتری نگارنده در رشته  
که در سال در دانشکده دانشگاه تربیت مدرس به راهنمایی سرکار خانم / جناب  
آقای دکتر ، مشاوره سرکار خانم / جناب آقای دکتر و مشاوره سرکار  
خانم / جناب آقای دکتر از آن دفاع شده است.»

ماده ۳ به منظور جبران بخشی از هزینه های انتشارات دانشگاه، تعداد یک درصد شمارگان کتاب (در هر نوبت چاپ) را به «دفتر نشر آثار علمی» دانشگاه اهدا کند. دانشگاه می تواند مازاد نیاز خود را به نفع مرکز نشر در معرض فروش قرار دهد.

ماده ۴ در صورت عدم رعایت ماده ۳، ۵۰٪ بهای شمارگان چاپ شده را به عنوان خسارت به دانشگاه تربیت مدرس، تأدیه کند.

ماده ۵ دانشجو تعهد و قبول می کند در صورت خودداری از پرداخت بهای خسارت، دانشگاه می تواند خسارت مذکور را از طریق مراجع قضایی مطالبه و وصول کند؛ به علاوه به دانشگاه حق می دهد به منظور استیفای حقوق خود، از طریق دادگاه، معادل وجه مذکور در ماده ۴ را از محل توقیف کتابهای عرضه شده نگارنده برای فروش، تأمین نماید.

ماده ۶ اینجانب محمدرضا احمدخانی دانشجوی رشته زبان و ادبیات فارسی مقطع کارشناسی ارشد تعهد فوق و ضمانت اجرایی آن را قبول کرده، به آن ملتزم می شوم.

نام و نام خانوادگی: محمدرضا احمدخانی

## **Acknowledgements**

**I would like to acknowledge the careful supervision of this work, provided by Dr. Mohammad Dabir-Moghaddam, without whose helpful guidance and insightful suggestions the present thesis would have never become a reality. Many of my findings in this work originate from the numerous sessions that I met him. Special thank to Dr. Ali Afkhami for dedicating his time, energy to help me. Also I am grateful to Dr. M.M. Vahedi and Dr. A. Golfam as my professors. Also, I should express my thanks to the typists who patiently typed this thesis.**

## **Abstract**

Clefts and pseudo-clefts are constructions which are found in many Indo-European languages. These constructions are studied in detail, in most of Indo-European languages, specially in English. A number of linguists have studied these constructions, among them are Halliday and Prince.

The consequence of their studies is that cleft and pseudo-cleft constructions have discourse and communicative functions and semantic properties. The question that is put forward in this thesis is that "Are there cleft and pseudo-cleft constructions in Persian?" The hypothesis of this thesis is that there are cleft and pseudo-cleft constructions in Persian and they have communicative and discourse functions and semantic properties. In this research 11 stories by J. Al-e Ahmad , S. Daneshvar , M. Dowlat Abadi , S. Vakili and S. Hedayat were reviewed. From these books, 146 cleft and pseudo-cleft constructions were collected. On the basis of this corpus, one formula for syntactic structure of these constructions was proposed. Moreover, the analysis of these constructions, considering their context, has shown that cleft constructions in Persian have communicative and discourse functions such as, question-answer, contrast, and known fact and pseudo-clefts have functions such as question-answer and contrast.

key words:cleft,pseudo-cleft,Persian information structure

**LOB** : the Lancaster - Oslo / Bergen

**LL** : the London - Lund Corpus (The letters after LL and LOB show the category of text)

**#**: end of tone unit

**A**: the speaker identity

**sylls**:incomprehensible words where it is possible only to tell the number of syllables

**##** : marks what follows as discourse initial

**CHAPTER ONE**

**Introduction**

## **1.1 Study Of Language**

Our everyday encounters with language are so natural and so extensive that we rarely consider language as an object of sufficient interest to warrant study. Language is always there, and we make use of it automatically, often without any conscious effort. All human beings have known and used a language since childhood. On the surface, there is nothing particularly interesting about so commonplace a phenomenon as human language.

In fact, it is widely believed that, because everyone knows a language, everything about language is known.

Yet, this is far from true.

Since the use of language is so natural to all people, it may seem that language itself must be quite simple, perhaps consisting of many words but involving only a few principles that serve to control pronunciation and the organization of these words into sentences. However, investigation of any human language demonstrates that a language is an extremely complex, highly abstract, and infinitely productive system linking meanings with sounds (Falk 1978,P.3).

## **1.2 Functional Vs. Formal Linguistics**

If we want to draw a picture of today's linguistics, we can speak of three

dominant approaches in this field. These three approaches, in fact, are three dominant thoughts in today's theoretical linguistics. This means that each one has attracted considerable supporters and advocates, in a way that linguistics departments, books, articles, theses, magazines and scientific conferences are mainly concerned with these approaches. These leading approaches are formal linguistics, functional linguistics and cognitive linguistics. These schools are distinguishable as one considers language as a structure - based and mathematical system, the other as a system for communication, and the third as a cognitive system.

Functionalists believe that discourse and communicative function form syntax and other language forms. In other words communicative needs create syntax. Givon (1979) claims that there are evidence that show communicative function of language is prior to syntax and syntax has originated from it. These evidence are : a) historical development of language b) child's language acquisition and second language learning c) characteristics of spoken and written form of language d) properties of pidgin languages (Dabir\_ Moghaddam 1378. P.38)

According to Figueroa (1994, P.21) many linguists make a distinction between formal and functional linguistics. Lass (1980) has called these "speaker free" and "speaker centered", Peng (1982) "narrow" and "broad" linguistics, Lyons (1977) "micro - linguistics" and "macro - linguistics", Harris (1981) "autonomous" linguistics versus "integrational linguistics", and Hopper (1988) the "A priori grammar attitude" and the "Emergence of Grammar attitude".
