Acknowledgments

I would like to express my deepest gratefulness to my father, brother, sisters and especially my mother, whose unflagging support and encouragement sustained me throughout the years of my graduate study.

Warm thanks go to all my instructors who have inspired me throughout the years of my study.

Special thanks go to my honorable supervisor, Prof. Tahirian, whose thoughtful guidance, patience and sound revisions rendered the completion of the thesis possible.

My sincere gratitude goes to my colleagues, who collaboratively took part in the project and helped me with the fulfillment of the thesis.

Abstract

The present study focused on investigating the ESP needs of the Iranian students of Tourism, probing and comparing the high priority discursal features used by tour guides in authentic workplaces and in the two textbooks of tourism. For this purpose, first sixty students of tourism were selected randomly and their needs were investigated through a questionnaire. Next, the speeches of thirty tour guides were recorded and transcribed. Also, thirty passages from each textbook were selected in order to find out the high priority discursal features of tourism through "Tropes" discourse analysis software. The findings obtained from the three groups were compared employing chi-square test. The findings revealed that "communication" was the most important needs of the students of tourism. The high priority discursal features of tourism were also determined. The comparison revealed that the differences between the three groups were statistically significant. The result of this study can be useful for ESP instructors and material designers.
